

Week	Topic
Week 1	Objective of the course and Java Introduction
Week 2	Introduction to Distributed Computing and MapReduce
Week 3	Java introductory concepts and Object Oriented Programming
Week 4	Introduction to MapReduce use cases and pipeline, ssh
Week 5	File IO and Networking 1, File System Introduction
Week 6	File IO and Networking 2, HDFS
Week 7	Java Collection, Threads/ExecutorService and Exception Handling
Week 8	Java Generics, Optional and overall review, Hadoop Resource Management
Week 9	Hadoop Installation and hands on HDFS
Week 10	Combiner, Partitioner and TopN Pattern
Week 11	Custom Reader and Writer
Week 12	Hands on Application Development
Week 13	Application of Hadoop (ML algorithms KNN/Kmeans, Common Friends/Market Basket Analysis etc) – Algorithm
Week 14	Hadoop Source Code Walkthrough and Introduction to related applications (Hive, Kafka)
Week 15	Sort and Group Comparator
