

AI Impact on Legal Services

SOHAM BHATTACHARYA

April 10, 2025

AI in the Legal System

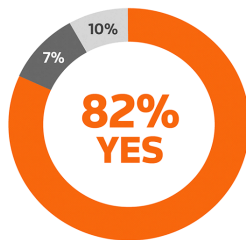

- AI is used for contract analysis, case prediction, and legal research.
- Some countries are testing AI judges for minor disputes.
- AI can review thousands of legal documents faster than humans.

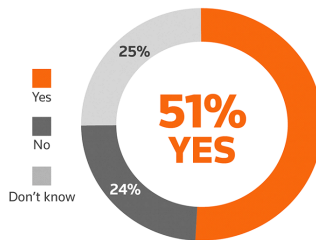

Views of Legal Sector towards AI

Figure 1: **Attitudes towards ChatGPT and Generative AI for legal work**

Can ChatGPT/generative AI be applied to legal work?

Should ChatGPT/generative AI be applied to legal work ?

Challenges & Ethical Concerns

- Can AI truly be impartial in legal decisions?
- Will AI completely replace human lawyers or help them?
- The Future Balancing AI efficiency with human judgment.

AGI vs AI

AGI	AI
Human-like learning and adaptability	Aimed to perform specific tasks
Broad and flexible	Narrow and task-specific
Highly autonomous	Limited autonomy

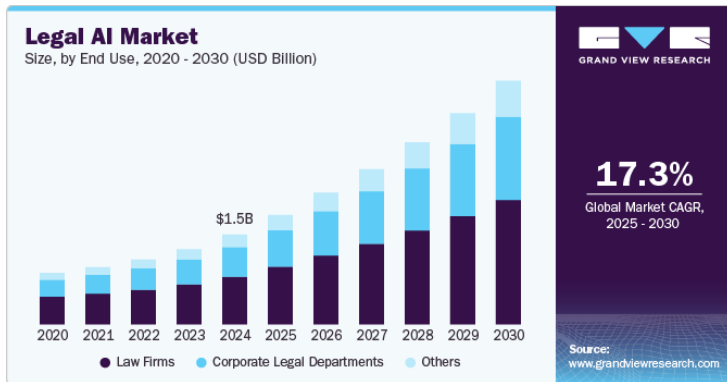

Table: Comparison between AGI and AI

Real-world Applications of AGI in Legal

Few real-world examples having a practical impact of AGI:

- **Case outcome prediction**
- **Contract automation**
- **Compliance monitoring**

Legal AI Market

Time Distributions
