✓ Assignment completed on 30th July 2024

Question No. 1 Find the maximum of two numbers without using any predefined functions

```
def maximum(a,b):  
    return a if a>b else b
```

```
a = int(input('Enter first number = '))  
b = int(input('Enter second number = '))  
print(f'Maximum of {a} and {b} is {maximum(a,b)}')
```

```
➡ Enter first number = 89  
Enter second number = -90  
Maximum of 89 and -90 is 89
```

Question No. 2 Find maximum of three numbers using user-defined functions

```
def max_of_three(a,b,c):  
    return a if a>b and a>c else b if b>c else c
```

```
a = int(input('Enter first number = '))  
b = int(input('Enter second number = '))  
c = int(input('Enter third number = '))  
  
print(f'Maximum of {a},{b} and {c} is {max_of_three(a,b,c)}')
```

```
➡ Enter first number = 323  
Enter second number = 84  
Enter third number = 0  
Maximum of 323,84 and 0 is 323
```

Question No. 3 Find the length of a string using user defined functions

```
def length(string):  
    count = 0  
    for i in string:  
        count+=1
```
